The attached articles from the National Review (May 16, 1994) are for your reference. The cover story questions the validity of the EPA's report on ETS.

Please let me know if you would like originals of this article or copies of the Regulation magazine article (G. Huber, et. al. -- No. 3, 1993) or the Congressional Research Services report (March 1994 report on taxation -- Appendix A on ETS) which are referenced. Both offer more extensive critiques of the EPA's use of science in the ETS risk assessment. Some of you may have these documents.

I would be grateful for your ideas and suggestions on how we might utilize these materials in efforts to seek balanced coverage internationally.

Best wishes,

Jan
